Safe Parenting is a concept that is practical and realistic in today's chaotic world. We are currently living in a world where every day our children are faced with imminent dangers. Whether it be bullying at school, child abusers lurking in our midst or any life tragedy, we as parents need to be able to protect our children & teach them strategies for safety. We need to be able to parent to the best of our abilities! This parenting program is designed to help parents identify warning signs & take precautions when life gets chaotic.
